Project Title: Breast Cancer Biomarkers Based on Fine Needle Aspirates

Principle Investigator: Michael H. Torosian, M.D.

Institution: Fox Chase Cancer Center

Performance Period: 1 May 1999 - 30 April 2000

Breast cancer is the most common cancer and a leading cause of cancer deaths in women in the United States. The purpose of this project is to identify one or more biomarkers which can be used to identify women at highest risk of developing breast cancer <u>before</u> cancer develops. Prior to undergoing breast surgery, women at increased and normal risk of developing breast cancer will undergo fine needle aspiration (FNA) for determining a series of cytologic, cell cycle and molecular biologic markers of clinical significance for cancer development.

The specific aims of this study are to:

- 1. Compare the findings of biomarkers in FNA specimens in women at increased <u>versus</u> normal risk of breast cancer.
- 2. To determine if FNA specimens are adequate to perform biomarker assays and if this technique could be used in the general outpatient setting.
- 3. To determine if biomarker levels between high risk and control patients are concordant or discordant and if one or more of the specific biomarkers can distinguish high-risk from control patients. Specifically, the biomarkers will include cellular morphology (cytology), cell cycle analysis (DNA index, cell cycle perameters and proliferation index) and molecular biologic markers (epidermal growth factor receptor overexpression, p53 and RAS hotspot mutations and hypermethylation of specific gene products including p16, GSTP 1 and E-cadherin) of clinical significance for the development of cancer.

At Fox Chase Cancer Center, a combined research team of clinicians and researchers are able to perform these analyses. Samples will be collected on patients who consent to the study and who are undergoing elective breast surgery. Our goal is to study approximately 200 patients over a 3 year period with this technique.

This is an import research project with tremendous clinical implications. All of the biomarkers chosen for testing and analysis have known importance for the development of cancer. Our goal is to identify one or more of these biomarkers which will provide important information regarding breast cancer risk and diagnosis not obtainable with currently available breast cancer screening methods. Michael H. Torosian, M.D. has recently assumed the role of principal investigator of the project and has updated the clinical and scientific aspects of this project. Over the next several months, several important meetings of the co-investigators will occur prior to formal submission of this research application to the IRB at Fox Chase Cancer Center. Once approval is received from the IRB, subject accrual to this important project is expected to occur immediately.

Statement of Work

Months 1-2: Meet with all Co-Investigators to finalize project
Perform final statistical projections and make final project revisions

Months 3-4: Submit project proposal to Research Review Committee and IRB at Fox Chase Cancer Center

Months 5-12 Patients to be accrued to study FNA specimens to be obtained

Biomarker assays to be performed on an ongoing basis

a. Cellular morphology (cytology)

b. DNA index (ploidy) and cell cycle parameters (% cells in S phase, % cells in G₂M, % hypertetrploid cells)

c. Proliferation index

d. Epidermal growth factor receptor (EGFR) overexpression

e. p53 hot spot mutations f. RAS hot spot mutations

g. Hypermethylation of specific gene products

1. p16

2. GSTP 1

3. E-Cadherin

Months 13-36: Continue to accrue patients to study, obtain FNA specimens and perform biomarker assays.

Perform statistical analysis and prepare results for publication

1990 - 1991	Clintec Nutrition Company Research Grant #40668 Deerfield, IL "Lipids and Tumor Growth and Metastasis" M.H. Torosian (P.I.) \$61,735
1992 - 1994	National Institutes of Health/ National Surgical Adjuvant Breast Project Breast Cancer Prevention Trial "Tamoxifen as a Prevention in Women at High Risk for Breast Cancer" M.H. Torosian (P.I) \$105,000
1993 - 1995	Eleanor Gray Memorial Fund Research Foundation Grant "Treatment of Cancer Cachexia-An Innovative Metabolic Therapy" M.H. Torosian (P.I.) \$12,000
1993 - 1996	National Cancer Institute RO1-CA-58358-01 Bethesda, MD "High - Resolution Magnetic Resonance Imaging of Suspicious Breast Lesions" M.H. Torosian (Co - P.I.) \$1,099,864
1993 - 1998	National Cancer Institute Surgical Oncology Research Training Grant #5 - T32 - CA09619 - 09 Bethesda, MD M.H. Torosian (Faculty Preceptor) \$134,625
1994 - 1997	John Wayne Cancer Institute JWCI Melanoma Multicenter Selective Lymphadenectomy Trial M.H. Torosian (P.I.) \$10,000

> 1995 - 1996 National Institutes of Health/ National Surgical Adjuvant Breast Project **Breast Cancer Prevention Trial** "Tamoxifen as a Prevention in Women at High Risk for Breast Cancer" Michael H. Torosian (P.I.) \$25,795 1996 - 1998 American Cancer Society, National Division "Breast Cancer Staging with High Resolution MR Imaging" Michael H. Torosian (Co-Investigator) \$200,000 1997 -US Army, Department of Defense "Phase I. Trial with TALL -- 104 Cells for the Treatment of Metastatic Breast Cancer" Michael H. Torosian, (Co-Investigator) National Institutes of Health 1997 - 2000 Bethesda, MD "Breast Cancer Patterns of Care and Morbidity" M.H. Torosian (Co-Investigator) \$2,077,782 1997 - 2001 National Institutes of Health Bethesda, MD "A Clinical Study of MRI in Breast Cancer" M.H. Torosian (Co-Investigator) \$5,669,794 1998 - 2003 National Cancer Institute Surgical Oncology Research Training Grant #T32-CA09619 Bethesda, MD M.H. Torosian (Faculty Preceptor) \$788,919 1998-2002 National Institutes of Health Bethesda, MD "Breast Cancer Patterns of Care and Morbidity" M.H. Torosian (Co-Investigator) \$2,077,782

Major Teaching and Clinical Responsibilities at the University of Pennsylvania:

1986 -	Clinical Practice of Surgical Oncology 12 Months/Year. Surgical Residents & Medical Students
1986 - 1991	Basic Science Lecture Series - Moderator Surgical Residents & Medical Students
1986 - 1993	Lecture, Surgery Core Course (Surgery 200) - Bi-Monthly 2nd - 3rd Year Medical Students
1988 -	Basic Science Research Mentor, Elective Work - Study Program 3rd - 4th Year Undergraduate Students
1991	Surgical Oncology: Advances in Breast & Gastrointestinal Cancers, Course Co-Director
1991 -	Surgical Oncology Preceptor, Elective Course (Surgery 321) - 11 Month/Year 3rd - 4th Year Medical Students
1993 -	Problem-Based Learning Session, Core Course (Surgery 200) Bi-Monthly 2nd - 3rd Year Medical Students
1996 -	Surgical Oncology Research, Elective Course (Surgery 800), 4th Year Medical Students
